Vivid™ E90
Ultra Edition

gehealthcare.com/vivid
By 2030, 40.5% of the US population is projected to have some form of Cardiovascular Disease (CVD)\(^1\)

\(\sim 104\text{m} \) annual echo exams performed globally\(^2\)

10-15\% of echo exams result in sub-optimal images\(^3\)

90\% of sonographers experience symptoms of Work Related Musculoskeletal Disorders (WRMSD)\(^4\)

\$120+ billion yearly direct and indirect costs for employers\(^4\)

WORKLOAD IS HIGH.

WHILE ENERGY AND DETERMINATION PERSIST.

Demand for cardiovascular ultrasound exams is high and will continue to increase, with a mix of routine, follow-up and complex cases.

Using advanced clinical capabilities traditionally required extra effort and expertise - often resulting in delays and increased workload.

We strive to maximize efficiency with a system that helps you see more, easily achieve accurate measurements and minimize errors.
Vivid E90
Ultra Edition

Designed to provide you with uncompromised image quality, advanced visualization capabilities and easy measurements – while helping reduce tedious tasks and inter-observer variability.  

Leverage the cSound imaging platform

We are committed to support the vital work you do with patients every day. Leveraging artificial intelligence powered by GE Healthcare’s Edison™ platform, we’ve taken the extraordinary processing capacity of our breakthrough software beamformer, cSound™, to a whole new level.

Empower your care team with the expanded advantages of artificial intelligence of the Vivid™ E90 Ultra Edition system.

Achieve clinical excellence

Advanced quantification tools provide you with the ability to evaluate problems and pursue the path forward. Count on a full suite of intuitive tools to make your work easy and efficient. Accomplish reproducible results with advanced capabilities for quantifying heart function and valve anatomy in 2D and 4D.

Master complex exams

Due to a growing population of difficult to scan patients, XDclear™ probes combined with cSound beamformer technology make a difference in many of your exams, helping you quickly and easily acquire diagnostic images with confidence and without contrast.

Optimize your practice

Select either 22” OLED monitor or 24” LCD monitor

Intuitive 12” LCD touch screen

Adjustable floating keyboard

Convenient keyboard storage

Convenient cable management

Low power consumption with efficient and low-noise cooling

Easy mobility

MODERN ERGONOMICS

A familiar, yet modern and efficient design.
POWERED BY AI

Improve diagnostic speed and accuracy

Vivid E90 Ultra Edition introduces the latest AI-based technology to help reduce tedious tasks and improve workflow efficiency. You can diagnose more confidently and accelerate exams via automated (AI-driven) Cardiac Doppler and 2D LV measurements.

The results are impressive. Exam time is reduced, and operator fatigue minimized with up to 80% less clicks to get 2D measurements, and inter-observer variability diminished.\(^1\)

Discover the many innovations brought by the Vivid Ultra Edition, and more importantly, how these can contribute to make clinical practice - Elevated by You.

Ultra Fast.
Ultra Precise.
Ultra Efficient.

AFI LV with AI-based View Recognition

Fully automatic recognition of the apical imaging views and measurements of GLS and segmental longitudinal Strain for LV.

Cardiac Auto Doppler with AI

- **REDUCED TIME PER MEASUREMENT**: Up to 93%
- **LOWER INTER OPERATOR VARIABILITY**: Reduce variability by \(3\times\)
- **ACCELERATED WORKFLOW**: Fewer Keystrokes, Productivity improvement

Detectability\(^2\): 98%
At GE Healthcare we strive to empower you by reducing wasted time and effort. We aim to remove tedious tasks and help make every moment count for your patients - seeing problems clearly and quickly, performing procedures with great precision... and providing quality of care for all.

CLINICAL EXCELLENCE for the Echo Lab

AI Auto Measure 2D
With the power of AI, the manual caliper measurements can be completed with 3 clicks: Freeze - Measure - Auto. A full set of reproducible measurements will instantly appear on the screen.

AI Auto Measure Spectrum Recognition
With the power of AI, a wide range of Doppler measurements can be completed with 2 clicks: Freeze - Measure. A Doppler trace and full set of associated measurements will instantly appear on the screen.

CLINICAL EXCELLENCE for Pediatric Imaging

The smallest cardiac patients can pose the biggest care challenges with difficult to diagnose, severe conditions.

The Vivid E90 Ultra Edition helps you acquire images on a wide range of pediatric and neonatal patients, quickly and with few system adjustments enabled by Dynamic Auto Optimization. Two dedicated pediatrics probes, 6S-D and 12S-D, and two curved array probes, C1-6-D and C2-9-D, help you examine deep anatomy or shallow structures without sacrificing spatial or dynamic resolution.
Vivid E90 Ultra Edition

VIVID HEART APPLICATIONS

A wide range of clinical applications for use in Core Echo Lab, Interventional and Pediatrics.

FLOW QUANTIFICATION
- Cardiac Auto Doppler
- AI Auto Measure Spectrum Recognition
- BSI

CHAMBER QUANTIFICATION
- AI Auto Measure 2D
- Auto EF on DICOM

AFI FUNCTIONAL IMAGING
- AFI Stress
- Myocardial Work
- AFI RV
- AFI LA
- AFI LV with AI-based View Recognition
FLOWS QUANTIFICATION

Your time is precious. Save it.

**Cardiac Auto Doppler**

Semi-automatic Cardiac Doppler measurements.

Benefits:
- Enhances reproducibility of follow-up studies when used in automated mode
- Offers Doppler measurement in multiple cardiac cycles as recommended by guidelines for irregular heart rhythms
- Supports less experienced users with advanced automation

**CHAMBER QUANTIFICATION**

Precision at the heart of quantification.

**New in Ultra Edition**

**Ultra Edition**

AI Auto Measure 2D

Semi-automated LV dimension measurements (2D calipers) in the parasternal long axis view, reducing manual interactions.

Benefits:
- Achieves fast measurements of left ventricle dimensions:
  - Up to 80% less clicks
  - No need to scroll to look for ED and ES frames
  - Reduce manual workflow during analysis of cardiac images
  - Improves reliability and repeatability of measurements - potentially increasing reproducibility for follow-up studies

**Ultra Edition**

AI Auto Measure Spectrum Recognition

Semi-automatic selection of appropriate spectral Doppler measurement tool.

Benefits:
- Enables fewer manual interactions by automatically opening the appropriate measurement tool
- Works seamlessly with Cardiac Auto Doppler
- Enhances reproducibility of follow-up studies when used in automated mode
- Supports less experienced users with advanced automation

**Ultra Edition**

BSI 2.0

Insights into complex blood flow patterns such as vortex formation and duration.

Benefits:
- Provides multiple modes for visualizing blood flows, such as display of velocity vectors and pathway comets
- Provides complementary information for diagnosis of dilated cardiomyopathy and heart failure
- Opens new clinical research possibilities by providing measurements for studying vortex properties, such as vortex location, size and duration (time between 2 events)

**Auto EF**

Powered by AI-based View Recognition, Auto EF provides semi-automated quantification of left ventricular volumes and ejection fraction.

Benefits:
- Achieves fast measurements of ejection fraction
- DICOM support. Assessment of the left ventricle ejection fraction also on data sets acquired on other vendors’ systems for follow-up studies
AFI FUNCTIONAL IMAGING

From diagnosis to prognosis.

AFI Stress
This artificial intelligence-based tool provides Doppler measurements over all heart cycles for the most common parameters, supporting consistent results and potentially saving time in both adult and pediatric TTE studies.

MyoCardial Work
Using new and reduced load dependent parameters, Myocardial Work may provide more accurate and reproducible results, important especially for follow-up of patients over time. The new parameters are based upon the results obtained with AFI (longitudinal strain) by accounting for the systolic blood pressure measured at rest immediately prior to the echo exam, as well as the MV and AV opening and closure times.

AFI RV
AFI RV is a novel tool to assess the right ventricular function by advanced speckle tracking echocardiography.

Benefits:
• Offers renown Vivid AFI user interface and workflow to allow current and new users easy adoption
• Supports right ventricle free wall strain, global strain and Tricuspid Annular Plane Systolic Excursion (TAPSE)
• Follows the 2018 EACVI-ASE Strain Standardized Task Force guidelines
• Supports right ventricle images also from previous releases

AFI LA
AFI LA Strain is a novel method to assess the left atrial function allowing global strain to be measured using speckle tracking echocardiography.

Benefits:
• Offers Vivid renown AFI user interface and workflow allowing users to easily adopt
• Supports left atrium strain, volumes and emptying fraction measurements
• Follows the 2018 EACVI-ASE Strain Standardized Task Force guidelines
• Supports left atrium images also from previous releases

AFI LV with View Recognition*
Powered by AI-based View Recognition, AFI LV provides semi-automated quantification of left ventricular global and segmental strain.

Benefits:
• Offers advanced industry pioneered speckle tracking algorithm for quantifying myocardial deformation
• Works seamlessly - integrated ejection fraction calculation
• Supports Adult and Pediatric TTE and Adult TEE images
• Provides time savings via automatic selection of the appropriate 4-chamber, 2-chamber and APLAX images for analysis
• DICOM support. Assessment of the left ventricle ejection fraction also on data sets acquired on other vendors' systems

AFI LA Strain is only applicable to images acquired with TTE probe on GE systems.
SEAMLESS WORKFLOW INTEGRATION

POST PROCESSING & REVIEW

OPEN STANDARDS

INTEGRATION WITH YOUR WORKFLOW

EchoPAC Software Only and EchoPAC Plug-in:

- Analyze and review data from GE Healthcare Vivid family of scanners, as well as DICOM images from other ultrasound systems.
- Access all Vivid measurement and review tools utilizing GE Healthcare Raw Data or industry standard DICOM data.
- DICOM Image transfer with optional GE Healthcare Raw Data transfers images easily in your existing workflow.
- DICOM SR Measurement Transfer including standard and custom measurement allows seamless integration with GE Healthcare and other industry reporting systems and EMRs 11.

EchoPAC Plug-in is available for:

- GE Healthcare Centricity™ Cardio Enterprise with Intelligent Reporting (IR).
- GE Healthcare ViewPoint™ 6 with EchoPAC Suite 10.
- As a plug-in to third party PACS.

With Centricity Cardio Enterprise IR, routine adult echo reports are complete before the physician opens the exam to review. 83%
The SonoDefense strategy consists of SIX LAYERS, with each layer enhancing the overall security of the system and help protect patient data.

SonoDefense is designed to:

- Keep the ultrasound machine safe and functional in the face of cyber threats
- Protect patient data on the machine from unauthorized access
- Enable you to successfully implement patient data and security policies, while still managing product daily workflows

SonoDefense strategy applies to Vivid portfolio:

- Windows® 10 IoT Secure Operating System provides multi-layered security
- Application whitelisting prevents malware execution
- Configurable user security provides user authentication and access control
- Data encryption protects stored data and during transmission
- Network firewall disables unneeded operating system services
- Integrates with existing facility security infrastructure

Healthcare institutions are under growing threats of cyberattacks—and the implications for data security, patient privacy, and the quality and cost of care are staggering.

Protecting against these threats and safeguarding your patients and your institution requires more than anti-virus protection. SonoDefense is GE Healthcare’s multi-layer strategic approach to cybersecurity and patient data privacy for ultrasound.
Probe mishandling can lead to damage which can cause faulty data and may lead to incorrect medical decisions. Ultrasound is especially vulnerable to operator-dependence leading to variability between exams.

Healthcare is a soft-target for hacking and ransomware. $4B cost added in 2019.

Constrained budgets increase pressure to do more with less and to optimize assets.

Probe mishandling can lead to damage which can cause faulty data and may lead to incorrect medical decisions.

ULTRASOUND IS ESPECIALLY VULNERABLE TO OPERATOR-DEPENDENCE LEADING TO VARIABILITY BETWEEN EXAMS

PERFORMANCE OPTIMIZATION PARTNERSHIPS

Purchasing a GE Healthcare ultrasound is not only getting access to a high-technology or remarkable clinical applications. It’s about enjoying a new user experience, at every step of ownership. We help you to outperform today, while preparing your department for tomorrow’s challenges.

STAFF EXCELLENCE
A comprehensive portfolio of training for clinical and technical users.
Helping you and your team build customized development plans to foster excellence and increased confidence.

ASSET OPTIMIZATION
Customizable dashboards for asset utilization and consulting services to provide actionable insights.
Achieving more with your assets to improve patient care and realize department strategic plans.

PROACTIVE MANAGEMENT
Use digital technology and tools to minimize expensive and disruptive unplanned downtime.
Proactive monitoring to help reduce cost and revenue loss from unplanned failures and automated updates for peace of mind.

IMPROVED UPTIME
Best-in-class repair services to drive uptime. Fully scalable from full coverage to shared maintenance.
Thoroughly aligned with your own in-house capabilities, providing the right balance between staff autonomy and our expertise.

DEVICE PROTECTION
Keep your device state-of-the-art with software upgrades, new applications and security patches.
Optimizing your device to drive clinical and operational benefits and help you stay ahead of the game, without changing your equipment.

PROBE PERFORMANCE
Customizable portfolio of solutions for probe lifecycle needs to improve availability and performance.
Proactive probe care that may help you increase diagnostic quality, decrease cross-contamination risk and expand the life span of the transducers.

PARTNERSHIPS DRIVE RESULTS
GE Healthcare is by your side to overcome these risks, helping you to:
- Keep your systems up and running, safe from breaches and cyberattacks
- Achieve more with your existing systems, without changing your investment plan
- Improve your activity, exam flow and staff planning, based on comprehensive data and reports
- Create comfort zone for your teams, reaching operational efficiency and clinical excellence
- Achieve high standard in probe-related cross-contamination and diagnostic errors

Ready to make your Vivid POP?
Complete lifecycle solution for clinical, operational & financial outcomes. You take care of your patients, we’ll take care of you.
UNLEASH THE POWER OF CONNECTED DEVICES

Your Vivid system has been designed to provide you with an optimal user experience. Connectivity is the key element to enjoy it fully, whenever and wherever you need it, regardless of site access restriction and planning constraints.

Discover a new world of services, included in every package:

REMOTE TECHNICAL SUPPORT
Access to experts anytime, anywhere

InSite™ connectivity enables OnDemand and real-time access to remote GE Healthcare experts
- Reduce disruptions
- Decrease system downtime
- Improve asset usage and staff productivity
It provides secure remote connectivity without requiring any open inbound ports or VPN connection.

PREDICTIVE MAINTENANCE
Know the failure before it occurs

Transform unplanned downtime into planned service events with OnWatch technology. It provides automated, 24/7 system monitoring, capable of detecting a system failure before it occurs. Any deviation alerts our GE Healthcare engineers, who proactively work to keep your operations running smoothly.

DATA DRIVEN INSIGHTS
All the insights you need to decide, at your fingertips

Better decisions start with better data. iCenter™ is a secure, cloud-based asset management tool that offers comprehensive data analytics for your systems. It provides insights to make informed decisions and helps improve operational performance, optimize patient flow and maintain compliance standards.

MyGEHealthcare App is a complementary app that gives you access to the data 24/7 directly on your smartphone. You can receive notifications and create a service request anytime, anywhere.

REMOTE FIX
Real-time and interactive applications support

Digital Expert™ and STAR provide an interactive, real-time, flexible & convenient way to get education and support.
- May help improve training outcomes
- Increase capacity and efficiency
- Train staff on a short timeline

NEW REMOTE SUPPORT

NEW AUTOMATED UPDATES
No need to worry about your system safety

Get automated software updates with eDelivery along with safety patches enabled by remote software download.

SonoDefense provides the highest level of cybersecurity to keep your systems up-to-date, with no impact on your operations. No on-site intervention needed.
About GE Healthcare

GE Healthcare is a leading global medical technology and digital solutions innovator. GE Healthcare enables clinicians to make faster, more informed decisions through intelligent devices, data analytics, applications and services, supported by its Edison intelligence platform. With over 100 years of healthcare industry experience and around 50,000 employees globally, the company operates at the center of an ecosystem working toward precision health, digitizing healthcare, helping drive productivity and improve outcomes for patients, providers, health systems and researchers around the world.
